

Task: building your profile

By now you should have marketplace / platform where you are gonna sell your service and have few services which have high potential to rank you up fast with minimal experience

It's time to create your profile

How to build out profile that makes client want to hire you

1. Headline is eye-catching and informative
2. Description section, it's crucial to showcase your skills, experiences, and personality. Keep it short and sweet, highlighting your strengths and skills, projects, accomplishments, and education
3. If you have any positive reviews or feedback from previous projects, be sure to include them in your profile
4. Make your portfolio easily accessible and showcase your best work
5. If there is an option to include video on your profile, include it, introduce yourself in a more personal and engaging way
6. If you have education / certifications include them (least important point)
